SUMMARY

MERN stack developer and B. Tech (AI & Data Science) student, currently serving as a Software Development Intern at Fraylon Technologies building a hackathon management platform and an LMS. Creator of Brand Forge, an AI brand-kit and social-post generator transforming text prompts into on-brand marketing creatives. Possesses a strong interest in AI-driven design and content-generation systems.

TECHNICAL SKILLS

Core (MERN): MongoDB, Express.js, React.js, Node.js, JavaScript, REST APIs

Frontend: HTML, CSS, Responsive design, Figma (UI/UX)

Languages & Databases: Python, MySQL, PostgreSQL

Tools & AI: GitHub, VS Code, Postman, Prompt Engineering, AI-Assisted Development

EXPERIENCE

Software Development Intern — Fraylon Technologies, Hyderabad (Remote) *Jun 2026 – Present*

- Developed full-stack (MERN) features for a **hackathon management platform** and a **learning management system (LMS)** — React UIs, Express REST APIs, JWT-based role access, and MongoDB data models.
- Shipped production-oriented deliverables through a GitHub pull-request workflow, conducting code reviews and collaborating with frontend, backend, and content interns.

Content Writer & Machine Learning Intern — St. Mary's Software Hub, Hyderabad *March 2024-June 2024*

- Created technical and branding content (including social-media creatives) for institutional projects, using AI tools and prompt engineering to accelerate content production.
- Worked with a team of interns and presented technical projects in a clear, accessible way to non-technical audience.

PROJECTS

Brand Forge — AI Brand Kit & Social Post Generator | *MERN, AI integration* [Live Demo](#) ; [GitHub](#)

- Built an AI design-generation platform that turns a single text prompt into on-brand social-media creatives, enforcing saved brand guidelines (colour palette, fonts, tone of voice) through structured AI prompting.
- Engineered an automated system that extracts brand colours from logos, renders dynamic React templates, and exports to PNG while managing brand kits in MongoDB.

Learning Management System (LMS) | *MERN, role-based access — in progress* [GitHub](#)

- Developing a role-based LMS featuring a student dashboard, course progress tracking, mentor feedback, and assessments, with separate views and permissions for students and mentors via JWT authentication and protected routes.

Hackathon Management Platform | *React.js, Node.js, PostgreSQL* [GitHub](#)

- Built a centralized platform featuring participant onboarding, team formation, project-submission tracking, mentor assignment, event scheduling, and progress monitoring.

Getto — Quick-Commerce Clothing App (UI/UX Case Study) | *Figma* [Live demo](#)

- Designed a quick-commerce clothing app UI focused on faster delivery and higher cart value; implemented nearby-store availability for quicker fulfilment and a "complete the look under a budget" upsell flow.

EDUCATION

B. Tech, Artificial Intelligence & Data Science — St. Mary's Engineering College, Hyderabad *2023 – 2027*
CGPA : 8.43 / 10

Intermediate (MPC) — Gitam Junior College *Score : 97.8%* *2023*

SSC — Kakatiya Group of Schools *CGPA: 10 / 10* *2021*

LEADERSHIP & ACTIVITIES

- Led initiatives as Industrial Representative (IR) and Sports Club Secretary, while driving internal branding and social media content creation for the college.
